

Jump start your project by learning to work effectively with user stories

User stories are an integral part of any Agile project, providing fuel for the Agile development team.

Learning to work effectively with user stories will jump start the benefits of an Agile approach by delivering value frequently to your customers.

This one day course covers the essentials of creating and using user stories on your project and avoiding common pitfalls.

Who should attend?

Anyone involved in an Agile project: developers, testers, analysts, project managers and customers

You will learn

- ▶ How to write good quality user stories
- ▶ Decomposing projects into stories
- ▶ The life of a story
- ▶ Sizing and estimating stories
- ▶ Defining 'done' with acceptance criteria
- ▶ Decomposing stories into tasks
- ▶ Avoiding common problems using user stories
